

# Job Posting - Clinical Intern

## About Us

Nimble Science is collaborating with partners worldwide to advance next-generation microbiome-based diagnostics and therapeutics. We achieve this by leveraging our industry leading capsule-based sampling technology, which allows us to collect liquid biopsies directly from the small intestine.

As a Clinical Operations Associate, you will play a key role on the Clinical Operations team and contribute directly to our success by supporting the conduct of clinical studies utilizing our SIMBA capsule.

## Position Overview

This position presents a tremendous opportunity to quickly gain skills and experience of clinical trials. **Recruiting for a full time co-op internship (4 -16 months).**

## Responsibilities:

- Coordinate, prepare, and track clinical study regulatory and approval documentation for trial initiation
- Clinical confirmation correspondence with investigators, lab technicians and participants
- Screening and coordinating participants for inclusion in the clinical study.
- Maintain integrity of the clinical datasets and the statistics for the studies
- Tracking device performance statistics and summarizing data sets.
- Data auditing
- Support activities related to the maintenance of Nimble's ISO 13485 quality management system
- Maintain the regulatory and approval documentation to end of study.
- Other duties as required

## Qualifications

- Currently enrolled in a health or science related degree at a Canadian University.
- The candidate must demonstrate superior interpersonal, communication and leadership skills and be fluent in English.
- Be able to make good clinical judgment, be results oriented and be a team player.
- Have superior organizational and time management skills
- Previous experience in supporting clinical activities or patient experience is a bonus

## What We Offer:

- Training and external certifications to support designation as a clinical coordinator.
- A stimulating and supportive research environment in a multidisciplinary team.
- Opportunity to work with the international microbiome community through partnerships and events.
- Opportunities for significant professional growth and impact in medical device development.

## Position Details:

Position is a full time (37.5 hrs/week)

Position is either

- Full time permanent
- A full time 4-16 month internship for a study currently enrolled in an academic program

Start Date is January 6<sup>th</sup>.

Remote position.
